FINE CUSTOM CABINETRY

**BROOKHAVEN**<sup>®</sup>  
CABINETRY

COLUMBIA CABINETS IS THE EXCLUSIVE DISTRIBUTOR OF  
WOOD-MODE AND BROOKHAVEN FINE CUSTOM CABINETRY  
IN THE CAPITAL DISTRICT.

Wood-Mode is the oldest continuously operated custom cabinetry company in the United States. Built and finished in Kreamer, PA, the cabinetry is built-to-order using hand selected and kiln-dried furniture grade woods. This extraordinary quality is backed by a liberal lifetime guarantee.

Columbia Cabinets and Wood-Mode are leaders in the green building movement with an exemplary record of long-standing environmental accountability. Some of the significant highlights:

- In 2007, Wood-Mode received certification in the Environmental Stewardship Program by the Kitchen Manufacturer's Association, which recognizes and applauds industry manufacturers who engage in the use of environmentally friendly materials and manufacturing processes.
- 15 years ago, Wood-Mode installed a Regenerative Thermal Oxidizer (RTO) System for the destruction of Volatile Organic Compounds or VOC's from the manufacturing process, instead of sending the VOC's directly into the atmosphere.
- Wood-Mode burns all of its wood scraps and sawdust to create steam for their dry kilns and heat for their plants creating energy efficiencies and eliminating landfill and resulting methane gas emissions.
- Wood-Mode purchases its hardwood lumber from forests in the Northeast US and Eastern Canada that grow at twice the rate of harvest. They are never clear-cut and any timber 12" in diameter or less is left standing.

## WOOD-MODE 84 FRAMELESS CABINETS FEATURES AND CONSTRUCTION DETAILS

### Frameless Cabinetry:

- Provides approximately 10-15% more storage than the same sized traditional framed cabinet.
- Wall cabinets are 13" deep (compared to standard 12" D), base cabinets are 24" deep as standard.

### Warranty:

- Wood-Mode's Limited Lifetime Warranty on finish
- Limited Lifetime Warranty on hinges and drawer glides.

### Cabinet Sides:

- Choice of 11/16" thick furniture grade plywood or furniture grade particle board sides veneered with maple wood, maple wood grain or white melamine.
- Finished sides will be veneered with matching wood and finish to door.

### Cabinet Tops and Bottoms:

- Choice of 11/16" thick furniture grade plywood or furniture grade particle board tops and bottoms veneered with maple wood, wood-grain laminate or white melamine.
- Tops and bottoms are doweled and glued into cabinet sides.

### Cabinet Backs:

- Choice of 1/4" thick plywood or hardwood backs that are veneered with maple wood, wood-grain laminate or white melamine.
- Backs are tongued and grooved into cabinet sides, tops and bottoms, glued and pinned in place.

### Shelf Construction:

- Choice of adjustable Full Depth 11/16" thick plywood or furniture grade particle board shelves (compared to industry standard 5/8" thick and half depth shelves) surfaced with white melamine, wood-grade melamine or maple veneer with matching finished edges and routed for locking metal shelf clips.

### Drawer Construction:

- 5/8" thick hard maple dovetailed drawer boxes with 1/4" thick maple veneered plywood bottoms.
- Two additional standard drawer choices are a white or stainless steel tandembox. The white tandembox is constructed with metal sides powder coated in a white finish. The drawer backs and bottoms are 5/8" thick and are surfaced in either white or wood-grain melamine.
- Walnut available as an upgrade option.

### Drawer Glides:

- Full-extension, undermount, Blumotion soft-closing drawer glides, rated to support 90 pounds.

### Doors:

- Solid 3/4" thick finished wood of choice. Certain door styles are 1" thick.
- Door style available is Full Overlay.

### Door Hinges:

- European soft-closing fully-concealed Blum hinges.

### Hardware:

- Choice from Wood-Mode's New Decorative Hardware Collection.
